1. Read for pleasure 20 minutes nightly
2. Valentines

Math IXL: Fractions, Time

Class Web site:

meeuwsenfamily.weebly.com

Please remember that Thursdays we go to Library and assist your student in returning books by Thursday morning. Thank you also for making sure your student has a healthy snack every day.

This is a busy week. Wednesday grades 2-5 attend the play at Tualatin High School in the morning. We have our Valentine's Party in the afternoon. The party begins at 1:30. We will be opening up our Valentine's and having a treat. Kids love to open Valentines!

Our Unit 4 Math Unit covers Fractions, Time Measurement and Graphing. I will be covering them all and making sure kids are proficient as we go. At home you can be assisting with telling time to the nearest minute on an analog clock if your student does not know it. We will be doing a fun graphing project where students will be surveying the class and graphing results.

We are so lucky to have Ms. Brown-Lundh as our Music Specialist! She is facilitating our third graders in an awesome music program that we will perform for you on Thursday, February 22nd. Please mark your calendars! We need all students to participate to make it the best!

Our class will be collecting and organizing Personal Care Kits that the whole school donates the weeks of March 5-March 16th. We really need parent help assisting to organize the donations that come in. If you are interested, let me know.

READING: Lesson 17

What can fossils tell us about the past?

STORY STRUCTURE

MATH: Unit 4: Fractions

WRITING: Imaginative

THEME: Country Slideshow

Yes, we have read the
Meeuwsen News!
